

K-Love radio serves the Denver, Colorado area and is a much appreciated service that enriches many lives. To lose this station will be a tremendous loss to thousands of listeners in this area.

If the current FM frequencies are replaced by Low Power FM, we (the Denver area) may not be able to receive K-Love's signal..Please don't let this happen.

Sometimes 'new' technology doesn't mean better service, especially 'community service.' I hope and pray that K-Love will be able to continue delivering the programming it currently provides.

Thanks!
